

## Enjoy the experience of exploring Holbox.

**Hotel Las Nubes** invites you to explore Holbox and live endless experiences.

Holbox is a small white sand island located at the north of Quintana Roo, where the waters of the Gulf of Mexico and the Caribbean Sea are united. The island has paradisiacal virgin beaches that seem infinite; sandbars that emerge from the sea, giving birth to corridors surrounded with crystalline waters that are intermixed with a mangrove and numerous channels that go through the Yum Balam Biosphere reserve, and at the same time it acts as the shelter of tenths of birds, fish and turtles.

The caribbean town of Holbox stands out for its polite people and its sandy streets, all the people move around by bicycle or golf carts since there are almost no cars in the island.

A caribbean easy going architecture with woven palm roofs gives way to a wide gastronomic variety. Styles and fusions of Mayan, Italian, Japanese, Cuban and Mexican cuisine always prepared with fresh products from the sea, such as lobster and octopus, fished at shore and brought to your table by the own settlers.

The gastronomic fusion is probably due to the European, Caribbean and American travelers that were captivated by the beauty of the island and decided to indefinitely extend their visit, and thus they set up restaurants and bars that offer a space for the tourists and the natives with unique recipes such as lobster pizza, *ceviche*, *aguachile* and several dishes prepared with sea bass, halibut and octopus.

The streets hold one more secret: they tell the story, the identity and the traditions of the island through attractive murals with ecological touches, which are renewed year after year in the Public Arts International Festival, in which artists from around the world flood and interpret the life and soul of the island, giving an unusual color perspective to the white walls and the streets with sand that will look that way all year round. An outdoor art gallery!.

The landscape is absorbed by the nature that surrounds the island and by the coexistence of its other visitors that migrate year after year.

We are talking about the whale shark, the biggest fish of the world, a peaceful and calm animal that the settlers call “domino” because of its dark color and its strange pattern of white spots. This noble giant comes to the island in search of food and a safe sanctuary. Holbox is one of the few places in the world where it is possible to swim near the whale shark. “Domino” is not the only island visitor, tenths of manta rays, dolphins, turtles and flamingoes arrive at different times of the year, offering exceptional experiences.

Another experience offered by Holbox is the tour around the Bird Island (isla Pájaros), a sanctuary that protects over 140 species of birds, or Passion Island (isla Pasión), praised by its beautiful virgin beaches, an idyllic space to relax and to share with your partner.

If you want to refresh yourself, the best option is to visit the natural well, *Yalahua*, to swim and to enjoy the healing benefits of the mystical natural spring.
